

Brandon is a leading company in Sweden within Brand Merchandise, with the goal to strengthen our customer's brands and to combine sound business operations with social and environmental responsibility.

Brandon's commitment to the environment and social responsibility is integrated into our management system ISO 9001.

We have an environmental policy as well as a well-developed cooperation with Swerea, a Swedish research group for industrial renewal and sustainable development, to ensure the awareness of the potential environmental risks. Products produced in compliance with required international standards are an essential prerequisite for all our suppliers. Brandon is also a registered member of several organizations for taking environmental responsibility.

Our Code of Conduct is based on BSCI (Business for Social Compliance Initiative) and the UN Global Compact's 10 principles. Through our membership of BSCI, Brandon is committed to working for the follow-up of our suppliers' ability to meet our Code of Conduct. Regular audits of factories help us to detect and minimize negative effects on the environment and human rights.

As a full-service provider, Brandon has both the capability and proven experience to supply ethically sourced merchandise on a local and global basis. Brandon puts an effort into sourcing sustainable materials and creating products that will last for a long time.
